TC-90™ BI-SPECTRAL CARD CAMERA

THE NEW STANDARD OF ELECTRICAL ASSET MONITORING

"This technology has already revolutionized the way we diagnose issues by allowing us to safely look inside any low, mid or high voltage system while keeping our technicians out of harm's way. We believe this system should be considered an essential tool in all situations where ongoing electrical maintenance is required.

Our team is convinced that this technology is a significant part of the future of safety and predictive maintenance. And our goal is to share our success and help spread the word to keep others safe and the grid up and running. This is the new standard at Puget Sound Energy."

-Ryan Severe, Senior Plant Engineer
