Full PTZ Bi-spectral Camera

POWERFUL LONG-RANGE THERMAL AND OPTICAL MONITORING

The Full PTZ Bi-Spectral Camera offers advanced bi-spectral imaging with an impressive monitoring range of up to 2 miles—ideal for mid- to long-range applications. Designed for performance in any environment, it delivers continuous real-time monitoring and temperature data collection, even in challenging weather conditions.

Equipped with a built-in pre-alarm system, the camera enables early detection of anomalies—alerting operators before a failure or catastrophic event occurs. With proven capabilities including the detection of a 1m x 1m fire from up to 5 miles away, it's a powerful solution for fire prevention, safety assurance, and operational oversight. Some other key applications include perimeter and site security, thermal monitoring of utility substations and surveillance for mass transit and more.

Seamlessly integrates into SYTIS systems such as GridSafe™, Vehicle Mounted Units, and Mobile Inspection Units (MIU), making it a versatile choice for scalable remote monitoring solutions. NDAA and NFPA 70B + 70E compliant.
